One copy of each of the listed documents is submitted herewith.

The present Information Disclosure Statement is being filed (1) no later than three months from the application's filing date or (2) before the mailing date of the first Office Action on the merits (whichever is later), and therefore no certification under 37 C.F.R. § 1.97(e) or fee under 37 C.F.R. § 1.17(p) is required.

Abstract 10173836 constitutes a concise statement of relevance of Japanese Patent No. 10-173836.

JP 2-70465 discloses a print control device. The drawing process and print process are respectively executed as drawing task and print task by task process section. The task control section controls the execution of both of drawing task and print task. The priority of the print task is higher than priority of the drawing task under the control of the task control section.

The submission of the listed documents is not intended as an admission that any such document constitutes prior art against the claims of the present application. Applicants do not waive any right to take any action that would be appropriate to antedate or otherwise remove any listed document as a competent reference against the claims of the present application.

Respectfully submitted,
